I am a skilled Mern and React Native developer with over a year of self-driven experience. Throughout this time, I have developed various projects, showcasing my ability to build robust and scalable applications. My recent internship at Eziline Software House PVT LTD in Rawalpindi, Pakistan, further honed my skills in mobile application development, where I contributed to real-world projects and collaborated effectively with a team of developers. I am passionate about coding, continuously improving my skills, and eager to take on new challenges in the tech industry.
